

Hands-On Challenge: Using IAM

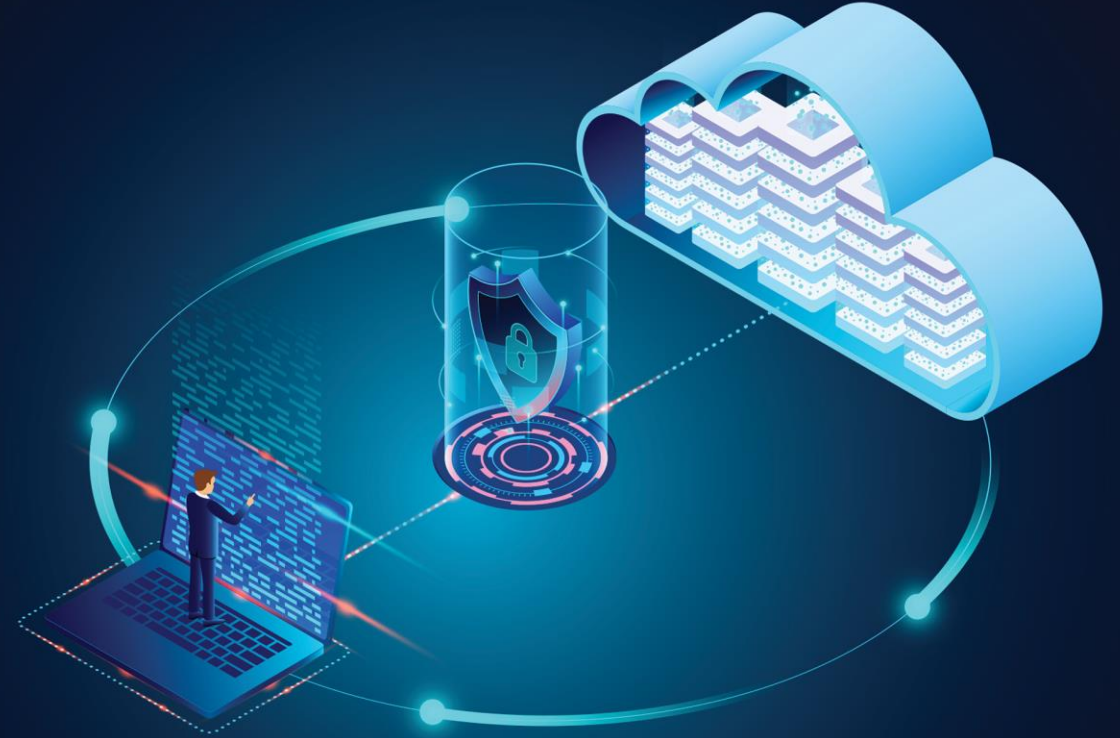

AWS Certified Solutions Architect - Associate (SAA-C02)

- Create an IAM group with a Name tag of **iam_grp_rdsro**.
- Assign this group a policy that permits read only access for **RDS**.
- Create an IAM user with a Name tag of **iam_usr_rds1**. Ensure this user account is a member of the **iam_grp_rdsro** group and that the account only has **Management Console** access.
- Delete all resources created in this challenge.
- As in all Hands-On Challenges in this course; accept the defaults for any settings not explicitly or implicitly specified.
